Introduction

Under the General Data Protection Regulations (GDPR), individuals have a right to be informed about how the school uses any personal data that we hold about them. This report provides information on the kinds of personal data we hold as a school and why and how we might use it.

Schools use a variety of personal data as part of their work and we take great care to ensure that this information is kept safe and secure. Personal data includes things like names, addresses and age, information that we need in order to comply with our statutory role in educating pupils.

Most of this data is essential and does not require your consent to use it. Some personal data is not essential and for that, depending on age, we require the consent of either the pupil or parent. An example of the kind of data that needs consent would be using pupil photographs on the school website.

In this GDPR asset register you will find a complete list of all the systems the school uses which hold personal data. The report also contains additional information such as what personal data items are held, the legal basis for doing this, along with a description of the system and why the school processes the data.

If you have any queries about this document or any other issue relating to personal data, please contact the school Data Protection Officer, whose name is on the front of the pack.

Description	Welcome to the World of Blooket: a new take on trivia and review games! The way it works is that a teacher/host picks a question set and a unique game mode. Then, we generate a code that players can use to join the game on their own devices. After the game starts, players will answer questions to help them win. That's where the fun starts, because we offer a variety of games to keep students engaged and excited!

System used: CPOMS

Description

CPOMS - Safeguarding and Child Protection Software for Schools Secure online monitoring of child protection, safeguarding and wider student pastoral welfare for schools. CPOMS is software application for monitoring child protection, safeguarding and a whole range of pastoral and welfare issues. Working alongside a school's existing safeguarding processes, CPOMS is an intuitive system to help with the management and recording of child protection, behavioural issues, bullying, special educational needs, domestic issues and much much more. Using CPOMS, schools can ensure that students are safe and fully supported, whilst school staff can focus on teaching and providing support, instead of administration.

System used: Places Leisure- School Swimming Management System

Description	The SSMS is a digital assessment tool, assessing pupils using Swim England School Swimming and Water Safety Charter. It is matched against the National Curriculum programmes of study and provides schools with termly reports. Reports evidence statistics to unlock Sports Premium funding for further swimming lessons. The product gives Places Leisure an important opportunity to gather national data to report on school swimming and influence national networks. Data gathered will strengthen potential to 'close the gap' for the 30% not yet meeting the standard. The system requires a school pupil data upload containing basic details for pupils swimming each term. Data is automatically uploaded to the Places Leisure School Swim App where school swim instructors assess pupils against Swim England's School Swimming Awards. Schools receive a termly update on pupil attainment for all pupils we have the data for.
